

BLACKBOILER

AUTOMATED CONTRACT MARKUP

About Us

BlackBoiler patented Automated Contract Markup technology is helping companies manage and negotiate contracts in a fraction of time. Using powerful AI and machine learning, BlackBoiler works by learning from edits to previously reviewed company documents and your company's standards to build bespoke editing models that instantaneously review and markup documents in track changes. The technology grows smarter and increases efficiency after every use, **cutting review time by up to 70%**.

Features

AUTOMATED CONTRACT MARKUP

Automatically markup in-bound contracts based on your company's standards and your historical edits.

INTEGRATE INTO YOUR WORKFLOW

Send an email with an in-bound contract to your company's BlackBoiler email address, automatically get a redlined version back in 2 minutes.

SMART CLAUSE LIBRARY

One-click insertion of your company's standard negotiation clauses organized by contract domain to ensure consistency across the entire company.

DATA DASHBOARD

Track efficiency gains in both individual contract review and collaborative working scenarios.

70%

REDUCTION IN CONTRACT REVIEW TIME

TE Connectivity, a \$14 billion technology manufacturer, reported a 68.9% reduction in contract review cycle time using BlackBoiler.
