

# Outlook integration

LawVu is a complete workspace platform and the integration with Outlook is designed to make your life easier.

- Create matters straight from your Outlook inbox
- Update matters
- Attach documents from email to matters within your email
- See email threads and attachments recorded against matters within LawVu

“Having the ability to integrate Outlook streamlined the process because it's all there. As you send an email, you can then file your matter into the system simply by clicking a few things. It is amazing functionality in terms of streamlining the filing process.”
