Leah Legal Copilot

MORE IMPACT. LESS COMPROMISE.

Transform legal work with Leah, the AI built by lawyers to help lawyers. Leah automates routine legal tasks with Generative AI and Large Language Models, freeing you to focus on high-impact work.

What Can She Do?

Leah Draft
Leah helps draft high-quality, customized documents. From regulatory update notes to drafting new contracts and memos, Leah saves you time and effort—giving you bandwidth to focus on refining and tailoring, while ensuring compliance.

Leah Extract
Leah easily extracts data from your legal documents with precision, using advanced techniques. With Leah, you can quickly extract critical data like clauses, dates, and parties involved. Easily filter, sort, and download the extracted data for analysis.

Leah Deal
Leah Deal streamlines M&A workflows, expediting deal planning and financial analysis while providing actionable recommendations. Designed to proactively identify risks and save resources, it empowers legal teams with advanced advisory capabilities for efficient management of complex transactions. Ultimately, Leah reduces M&A risk, supports decision-making, and contributes to strategic success.

Leah Discovery
Perform comprehensive discovery across multiple documents without any limitations on the size or number of documents. Get a detailed and complete analysis, with cross-file sourcing, to ensure you have all the necessary insights and data to make informed decisions.

Leah Impact
Gain comprehensive insights into your Leah Copilot projects. Track user activity, usage data, and real-time ROI and productivity. See how Generative AI is being utilized, identify users, and witness improved productivity with complete transparency.

Leah Redline
Leah can assist you in creating comprehensive risk and remediation reports, drafting contracts with clear and concise redlines, and streamline first drafts. Leah supports contract reviews by identifying unfavorable terms, leading to improvement in compliance.

Leah Playbooks
Leah Playbooks automates the creation of custom playbooks from your documents, eliminating manual work. With streamlined processes, ensure your playbooks are consistently updated. Use Leah Guidance to leverage these playbooks for informed decision-making, empowering your team with accurate insights. Elevate playbook management and drive efficiency with Leah.

Leah Claim
Leah Claim is a GenAI-powered module streamlining the management of large claim volumes. It centralizes a knowledge base for optimal outcomes, especially beneficial in sectors like insurance, medical, travel, and finance. Leah facilitates go/no-go decisions on claims, aligning responses with organizational precedents for effective defense or action.

Leah Guidance
Provide accurate answers and empower decision-making through reliable knowledge and recommendations. Trust Leah to guide you on the best course of action, even in challenging situations.

How She's Different

Leah delivers powerful GenAI through an easy-to-use interface designed specifically for legal workflows, terminology, and deliverables. This makes AI seamlessly usable for legal professionals.

- **Concurrent Analysis** brings speed, scalability, comprehensiveness and context to document review and discovery.

- **Cross-File Referencing** promotes transparency, accuracy, accountability, and contextual understanding when extracting insights across multiple documents.

- **Custom Queries** enable precisely tailored searches that provide users with more control, efficiency, and depth in extracting highly relevant insights from legal documents.

- **Expanded Capacity** allows maintaining speed, detail, and comprehensive insight, even for large-scale legal discovery and analysis. This enables uncovering subtle connections in big data and provides limitless detailed responses.

- **Unlimited Responses** allows AI systems to deliver truly comprehensive, detailed, and transparent analysis on even the most complex legal issues without artificial constraints. This ensures access to complete insights.

90%	90%		40%
90% faster document review and analysis	**90% precision in extracting insights**	**Uncovers connections across legal documents**	**Can reduce legal spend by up to 40%**

(Data based on ContractPodAI and PwC Case Study with a Financial Services Firm)

Developed by Lawyers, Optimized by AI Experts

- Legal experts provide domain knowledge for training data and algorithms
- Ongoing performance refinement by data scientists
- Training emphasizes ethics, confidentiality, and compliance

Transform legal work.
